

Genetics/Lab Results

Items you may wish to include in this section of your binder:

- Records of genetic results
- Records from labs
- Notes from labs
- Disease-specific information

Genetic counseling

Genetic counselors can assist families by:

- Obtaining and interpreting a genetic (DNA) or other appropriate test
- Obtaining a diagnosis for a genetic condition
- Determining whether parents of an affected child are carriers of the disorder
- Assessing the risk of passing on the disease to future children
- Determining whether other family members may be at risk
- Exploring resources for payment of genetic testing
